

Year 10 Geography

Students in year 10 will be studying Plate tectonics during the Autumn term. They must read around the subject and take part in independent research using the internet. Students will be given details on what to read and how to research in class. In addition to this individual homework assignments will be set for individual classes based upon the needs of the students. Please check students planner for details.

Year 11 Geography

Students in year 11 will be studying Plate tectonics during the Autumn term. They must read around the subject and take part in independent research using the internet. Students will be given details on what to read and how to research in class. In addition to this individual homework assignments will be set for individual classes based upon the needs of the students. Please check students planner for details. Being in their final year it is necessary for students to begin a revision timetable of the topics they have already studied. Further details and support will be given to students during class time.
